PLEASE READ BEFORE BIDDING

Coins and medals are sold at *so much per lot* and no lot will be separated. The auctioneer will accept an advance of 1 cent up to 50c., then 5c. up to \$2.50, when 10c. advance must be bid, up to \$10, when no advance under 25 cents will be accepted. You can bid anything up to 50c., after that the bid must be 55c., or 60c. Such offers as 51c., \$1.01, etc., are unavailable.

Auction sales are strictly for cash. Parties unknown to me and bidding for the first time, must give bank or other reliable reference.

Forward your bids as early as possible, as thousands of bids have to be entered. Do not make ridiculously low bids, such as 10 and 15c. on foreign silver coins worth several times over as bullion. Write your bids plainly, with a pen if practicable. I have taken special pains to carefully and fairly describe each lot.

Where the number of pieces in a lot is not given after the description, there is but one piece in the lot.

The coins, etc., in each lot are different unless otherwise described.

Be sure you bid on the lot you wish to buy.

All coins, etc., are genuine unless otherwise described.

My charge for executing bids will be 5 per cent. No charge made for bidding except for lots actually purchased. Remit by money order or New York draft, as the usual exchange fee will be deducted from checks.

We will price your catalogue for \$1.00.

A NEW WORK UPON THE UNITED STATES CENTS OF 1796.

After this sale, I propose to issue a pamphlet on the United States Cents of 1796, together with plates, showing about 30 varieties of obverses and reverses. Not only will the best part of Mr. E. Gilbert's remarkable collection be shown, but also some new varieties in the collection of Henry C. Miller, Esqr., of this city. All of the known varieties in these collections will be shown, and the union of the two collections will present, both for condition and variety, the greatest collection known.

As no similar work has ever been attempted, this pamphlet will be invaluable for future classification of the cents of this date. The fillet varieties will be given numbers, and the "cap" varieties will be given letters, so that new numbers and new letters may be added with the discovery of any dies new to these fine collections. Especially appreciative of this work should be the collectors of the cents of 1794, which are covered in a somewhat similar work by W. W. Hays.

This pamphlet will be for sale by me within about two weeks price \$1.00.

THOMAS L. ELDER.

“COPYRIGHTED.”

REMARKABLE COLLECTION OF UNITED STATES CENTS OF 1796.

The Property of E. GILBERT, Esqr., of New York City.

Each coin is different from the others, and is given Mr. Gilbert's classification letters and numbers for future reference.

CAP VARIETY.

- 689 A. Obv. L of "Liberty" touches cap; stand of T close to and entirely over the fore-lock. "Liberty" distant from milling; date well spaced. 1 touching lower lock of hair, and near bust. Pole close to bust with end distant from milling. Rev. Left wreath stem has nineteen leaves and five berries, and the right branch has seventeen leaves and four berries, wide space between "One" and "Cent"; stem and ribbon-ends long. Last cipher of fraction too high. "A" "M" and "E" of "America" are connected at their feet. Slightest abrasion on top hair. Fine.
- 690 B. Obv. same as "A". Rev. The left branch of the wrth. has 21 leaves and 5 berries, and the right 20 leaves and 5 berries. "AMER" of "America" connect at their feet, "N" and "E" of "One" touch at the top, also "ENT" of "Cent." There are five groups of three leaves each on the left branch of the wreath, and four groups of three on the right; the lowest leaf on the right branch points to the left foot of the final "A" of "America." Slight pin nick above cap. Fine.
- 691 C. Obv. "L" of "Liberty" nearly touches the cap, and "R" and "T" of the same word are very close to the hair; stand of "T" partly over the hair and forehead; figure "1" of date near lower curl and "6" distant from bust, 1, 7 and 9 being well spaced with 6 near the 9. Rev. Left branch of the wreath has 19 leaves and the right 17 with 4 berries on each; "AMER" of "America" connect at their feet; "A" and the second "T" of "States" nearly touch at the bottom; the lowest leaf on the right branch points to the right foot of the final "A" of "America", stem ends are long and slightly curved. Obv. known as the "open mouth variety." Very fine.

- 692 D. Obverse same as variety "C"; Reverse same as variety "B." Slight dent before neck and edge slightly rough. Very good.
- 693 E. "L" of "Liberty" nearly touches the cap. The stand of T is near, and entirely over, the fore-lock; the 1 of date is distant from the 7 and very close to the end of the lower curl of hair; the "G" is nearly as far from the 7 as the 7 is from the 1, while the 6 is quite close to the 9 and a little too high. There is a break at the end of the pole connecting it with the point of the bust. Rev. same as variety "B." Good.
- 694 F. Obv. Liberty, date and end of pole distant from milling, with the "L" very near the cap and "R" and "T" near the fore-lock. Date widely spaced and with clear field between hair and bust. Rev. Left branch of the wrth. has 19 leaves, and the right 16, with 5 berries on each branch. "Cent" low in wreath. "AME" of "America" connect at their feet; lowest leaf on right branch terminates directly under "C" of "America"; stem ends heavy. Legend distant from milling. Slight edge dents. Very good.
- 695 G. Obv. a very close copy of variety "C." By a comparison of the two pieces slight differences can be detected in the relative positions of 1-7 and 6 of date and the hair and bust. The pole is not as thick as on variety "C" and is farther from the bust. Rev. The left branch of the wreath has 21 leaves, and the right 20 leaves, with 4 berries upon each; legend distant from milling, first "S" of "States" is low; the first "T" is joined to the "A" at the bottom; "AME" of "America" are connected at their feet. The stem ends are thin and club-shaped. The lowest leaf on the right branch points to the right foot of the final "A" of "America"; figures of fraction distant from the dividing line, the left branch of the wreath has five groups of three leaves each, and the right three groups of three leaves. A very rare variety. Extremely fine. A beautiful light olive. Very rare. Cost \$35.00.

- 696 H. Obv. "L" of "Liberty" touches the cap, while "T" is more distant from the hair than any other variety known to me. The pole is distant from bust and extends nearly to the milling. Figures of date small, uniformly spaced and entirely detached from milling, hair and bust. Rev. Legend close to the wreath, many letters nearly touched by leaves, notably "UNITD" of "United", and "M" and final "A" of "America." Left branch of wreath has 19 leaves and the right 18 leaves with four berries on each branch. Figures of the fraction small; the first "S" of "States" is too large; "A" and "M" of "America" are connected at the base. Slight edge dent. Very good.
- 697 I. Obv. "L" of "Liberty" nearly touches the cap and "R" and "T" are closer to hair than on any other variety that is known to me. The date also is very close to the lower lock of hair and bust, and gives the coin the appearance of a large head crowding the lettering and date. Rev. Both branches of the wreath have 17 leaves each, with 4 berries on the left and 3 on the right. The letters "U" and "N" of "United" are connected at the top; the stem end at the right points to the right foot of the final "A" in "America"; figures of fraction small. Fair. Rare.

FILLET VARIETY.

- 698 No. 1. Obv. In "Liberty" "E" and "R" joined at the bottom, date is straight, uniformly spaced, except the 6, which is very close to the 9 and tilted to the right. Rev. Left branch of the wreath has 18 leaves and 3 berries, the upper one very small, and connected with the branch without a stem. The right branch has 17 leaves and 5 berries. "One" is high in wreath, the word "Cent" is low: First "S" of "States" is distant from "T", while "TAT" are very close together. In "America" "AME" are connected at their feet. Stem ends short, the right one pointing directly to the right foot of the final "A" of "America," and the left one to the curve of "U" of "United"; dividing line of fraction is long. About uncirculated, a medium olive.

Note. Numbers 689 to and including No. 698, on all the above-mentioned numbers the wreath branches, both left and right, terminate at the top with a single leaf.

- 699 2. Obv. "L" of "Liberty" slightly out of position to the left, "E" and "R" very close to the head; figures of date widely spaced, except the 6 which is a trifle nearer the 9 than is the 7, a die break makes the upper thus, 17 96. Rev. The left branch of the wreath has 20 leaves and 5 berries, and the right 18 leaves and 4 berries; the stem-ends are long and club-shaped, the one to the right nearly touches the right foot of the final "A" of "America," and the one on the left nearly touches the curve of the "U" of "United"; both branches terminate at top with a single leaf each, and as they point directly toward each other it gives the wreath an appearance of a perfect circle, and this characteristic may very easily be identified. On many of this variety may be found a die-break from milling to "R" of "America"; thence along the top of "ICA" and curving upwards ends at the milling. Fine.
- 700 No. 3. Obv. This obverse is very similar to the No. 2 (last described), it can be distinguished by the position of the figure 1 of the date in reference to the lowest lock of hair on the head of "Liberty." On this coin the figure 1 is a trifle farther from the hair than on the No. 2. Rev. The left branch of the wreath has 19 leaves, and the right 17, and each has 4 berries. The letters "TAT" of "States" and "AME" of "America" are connected at their feet. The lowest leaf on the right branch terminates under the left foot of the final "A" of "America."
- 701 No. 4. Obv. "Liberty" very near the milling, the date is straight and evenly spaced, except that the 6 is very close to the 9. Rev. Same as No. 3.
- 702 No. 5. Obv. Letters of "Liberty" evenly spaced, a die crack extends from milling through the left arm of the letter "T", and stand of same letter to the fore-lock. Another die-break starts in the field to the left of the lower curl, passing along the lower edge of the curl, through all the

- figures of the date. The figure 1 of date touches the hair of lower lock, the 7 and 9 widely spaced with the 6 nearly touching the 9; a die-break runs from the bust to milling to the right of the 6 of date. Rev. The left branch of the wreath has 14 leaves and 7 berries, and the right branch 18 leaves and 7 berries. "One Cent" is high in wreath. There is a die-break under the letter "E" of "United", and another to the right of "E" of "One", the wreath stems are slim and very crooked or twisted. The right branch is entirely severed from the ribbons and stem of the left branches, dividing line of fraction and stem ends are short, figures of fraction small. Very fine. Dark.
- 703 No. 6. Obv. Letters of "Liberty" evenly spaced. There is a die-break extending from milling to head, passing through the letter "T" of "Liberty". The figures of date are evenly spaced, slightly curved and close to milling. Rev. same as No. 5. Fine, a medium brown.
- 704 No. 7. Obv. Letters of "Liberty" large, close to milling and head, with but very little space between the letters; figure 1 of date nearly touches the hair of lower curl, and the 6 the bust. Rev., left branch of the wreath has 14 leaves and 6 berries, and the right 17 leaves and 7 berries; "One Cent" stands high in wreath, stem ends are short and club-shaped, that to the right pointing to the right foot of the final "A" of "America" and that to the left pointing to "U" of "United." This reverse resembles No. 5, of which it is a close copy, points of difference being as follows: One less berry on the left branch of wreath, and 1 leaf less on the right; the right branch forms a perfect connection with the left at the knob; under "O" of "Of" are but two leaves on this number, while there are three on No. 5; in the fraction the enumerator rests on the dividing line. Slight scratch on obv. Fine to very fine, a light olive.
- 705 No. 8. This obverse can only be distinguished from No. 7 by the spacing of the letters in "Liberty." On No. 8 there is a much wider space between "L" and "B", and between "B" and "E" than on No. 7. In date the figure 6 is slightly tilted to the right. Rev. Same as No. 7. Nearly uncirculated, a medium olive.

- 706 No. 9. The LIBERTY variety. Letters of the word "Liberty" large and regular, and very close to hair and milling. The "B" has been recut over an "H" to correct a blunder of the die-sinker, which gives the word the appearance of LHHERTY. Rev. Same as No. 7. Very good. Rare.
- 707 No. 10. The obverse same as No. 9. Rev. The left branch of the wreath has 16 leaves and 6 berries, the right branch has 19 leaves and 5 berries; "One" high in wreath and "Cent" low; ribbon bows large and the ends are long and nearly reach to the milling; dividing line of fraction very short, the final "A" of "America" nearly touches the right ribbon end. Good. Rare.
- 708 No. 11. Obv. "Liberty". There is a die break extending from milling at the left of the lower lock of hair through the curls and figures 1 and 7 of date, thence around and at a sharp angle to the milling; figure 1 of date nearly touches the hair and 6 the bust. Rev. The left branch of the wreath has 16 leaves and 6 berries, and the right branch 19 leaves and 5 berries. Large ribbon bows detached from the stems, but not a sign of a knot; stem ends short; pendant ribbon ends long, the one at the right nearly touches the final "A" of "America", figures of fraction are distant from short dividing line. A poor specimen of a rare variety.
- 709 No. 12. Obv. In "Liberty" "B" and "E" and "T" and "Y" are widely spaced, the 1 of date nearly touches the hair and the 6 high, and decidedly tilted to the left, nearly touches the bust. Rev. Same as No. 11. Fine to very fine, a medium olive.
- 710 No. 13. Obv. The distinguishing feature of this cent, and by which it can be easily identified, is the wide space between the letters "R" and "T" of "Liberty". The date is nearly straight and has the appearance of being crowded. Rev. The left branch of the wreath has 16 leaves, and the right branch 19 leaves, with 5 berries on each; the ribbon bows are large minus the knot, and the pendant ends long and sprawling; figures of fraction distant from short dividing line; final "A" of "America" nearly touches the right ribbon end. Very good.

- 711 No. 14. Obv. This variety can easily be identified by the date which is straight, and the figure 6, which is tilted to the right, close to the 9 and connected with it by a small die-break. Between the 6 and bust is a raised point like a period, and between bust and chin, near the neck, are two more. Rev. The left branch of the wreath has 14 leaves, and the right branch 18 leaves, and each have 7 berries; the legend is very near the milling, the letters of which are nearly uniformly spaced and fairly distant from the wrth. This reverse is a close copy of the reverse of the 1794 cents, having the high ribbon bows, knot and pendant ends, and the fraction near the milling. It is the only variety of the 1796 cents to have two berries immediately at the left of the bows. Believed to be the rarest variety of the 1796 cents. This specimen is a gem jet black and about uncirculated, but has been skilfully plugged at top of head; Mr. Gilbert paid \$20 for this piece. Excessively rare.
- 712 No. 15. Obv. "Liberty" very close to both ribbon and head, the letters "E" and "R" nearly touch the hair; in the date the figure 1 touches the hair, and the top of the 6 is merged with the bust; there is a crack in the die, extending from the milling near the 9 of date, to the left, touching the bottoms of both 7 and 1, and then the lower curl, and continuing on to the milling. Rev. There are 16 leaves on the left branch of the wreath, and 19 on the right branch, and 6 berries on each; the lowest leaf on the inside of the left branch touches "C" of "Cent", and the lowest on the inside of the right branch touches the "T" of the word. A peculiarity of this coin is a single berry on the outside of the right branch, under the letter "C" of "America"; figures of fraction distant from short dividing line. A very rare variety. Extremely fine, of medium olive color.
- 713 Duplicate of No. 703. Very good.

“INDEPENDENT OF NUMISMATIC COMMERCIALISM?”

That a man has not the right to speak for an A. N. A. presidential candidate whom he regards to be the fittest person for the office, is the impression intended to be conveyed by a circular letter, bearing the signatures of at least **three coin dealers**, and addressed to one who has in the past **bought and sold many coins**. Here is a paragraph:—

“Our surprise is not only that you have an opponent, but that he is espoused by a dealer. The best interests of the A. N. A. can only be served by its President being independent of all numismatic commercialism.”

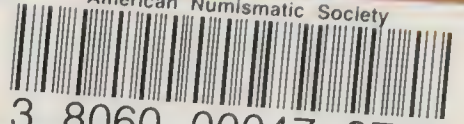

These persons may themselves have clear consciences on the point of their non-commercial numismatic instincts, but others who have received the circular matter, fixed price catalogues and auction catalogues, will draw their own conclusions, and condemn such inconsistencies.

Don't be misled in this campaign, but vote for the man unpledged to dealers, speculators or cataloguers. His name is Frank C. Higgins.
